SKILLS

HTML/CSS

- Build custom websites with responsive layouts
- Ability to reproduce visual design

JavaScript

- Experienced with basics and DOM Manipulation

Next.js + React

- Use libraries like Material UI and Semantic UI

RESTful Services/APIs

- Ability to manipulate data grabbed from API

Unit Testing

- Implement end-to-end tests with Playwright

Adobe Creative Suite + Figma

- Proficient in Photoshop, Illustrator, and InDesign

Interpersonal Communication

Organized

Dependable

Self-Motivated

Problem Solver

Leadership

AWARDS

Outstanding Achievement Award

2021, Riverside Secondary

EDUCATION

● Digital Design and Development, Diploma, 2021-2023

- GPA - 90%
- Developed several responsive web apps, primarily using modern front-end frameworks.
- Communicated clearly and patiently with groupmates, creating an elevated, positive experience.
- Teach classmates how to debug coding problems while explaining the solution.
- Assessed UX and UI designs for technical feasibility and implemented a new responsive, mobile-first approach.

● Riverside Secondary, Diploma, 2016-2021

- Dual Dogwood Certificate
- Participated in the French Immersion Program for 6 years

EXPERIENCE

● Lead Front-End Developer

Rooty, September 2022 - December 2022

- Developed a mobile-first full-stack web app using the front-end framework Next.js for low-income students to freelance their interdisciplinary skills to earn compensation for it.
- Converted Figma design to responsive cross-platform web app
- Communicated and collaborated with the back-end team every week to teach and learn from each other before integrating each other's code through Github, allowing us to work at a constant positive pace.

● Lead Front-End Developer

DrinkUp, January 2023 - March 2023

- Developed a desktop and mobile responsive web app using React and libraries for new adults to find their first favourite cocktail based on their preferences.
- Manipulate APIs like CocktailDB to extract specific data that matched the user's inputs.
- Wrote technical documentation to allow other developers to see what libraries I used and instructions for them to operate it on their own local computer.

● Developer, Designer, and Content Writer

She's A Keeper, December 2022 - February 2023

- Developed a responsive website from scratch using Next.js and libraries to create a cross-platform website for client.
- Researched inspiration and necessities for housekeeping websites that are modernly visually appealing on theme.
- Created wireframes to conduct tests with potential customers to analyze and accept feedback on how to improve how content should be displayed for ease of use.
